

REYNARD 2% CHLORHEXIDINE WASH CLOTHS

Instructions for Use

Chlorhexidine provides an invisible antibacterial barrier which continues to kill any harmful bacteria on your skin for multiple hours; maintaining you with an extra barrier of protection during the duration of your hospital treatment.

Each cloth contains 2% Chlorhexidine which rapidly destroys any harmful bacteria that may be found on your skin. Please note these cloths **DO NOT** contain any fragrance to avoid potential patient allergies.

- DO NOT USE THESE CHLORHEXIDINE WASH CLOTHS IF YOU HAVE AN ALLERGY TO CHLORHEXIDINE
- DO NOT USE CHLORHEXIDINE WASH CLOTHS IN THE BATH AND/OR SHOWER
- DO NOT USE CHLORHEXIDINE WASH CLOTHS NEAR YOUR EYES, MOUTH OR ANY OTHER BODY ORIFICE
- DO NOT APPLY OTHER PERFUMES, LOTIONS OR MAKEUP FOLLOWING APPLICATION
- IF CHLORHEXIDINE WASH CLOTHS ARE HEATED BEFORE USE, PLEASE ENSURE THE TEMPERATURE OF THE CLOTH IS CAREFULLY CHECKED TO AVOID SKIN SCALDING PRIOR TO APPLICATION
- PLEASE DISPOSE OF THE CHLORHEXIDINE WASH CLOTH (S) IN THE DESIGNATED WASTE RECEPTACLE IN ADHERENCE TO HOSPITAL INFECTION CONTROL GUIDELINES—DO NOT FLUSH

If redness or itching occurs and persists, please discontinue use. Ask your Nurse if you have any concerns or need additional assistance.

How to effectively use Reynard Brand Chlorhexidine Wash Cloths

Step One:

Shower or wash body and hair using normal soap and general hygiene practices

Step Two:

After normal washing, dry your body and hair well with a clean towel

Step Three:

Warm the packet of 4 wipes in a microwave for up to 20 seconds OR use un-heated

Step Four:

Open packet and use the first wipe on your hands and face, neck and arms

Step Five:

Use the second wipe on your armpits, chest area and the sides of your body

Step Six:

Use the third wipe on your groin and buttock areas

Step Seven:

Use the fourth wipe on your back and both of your legs

Step Eight:

Discard of all used wipes in the appropriate waste receptacle

Please note: upon use, you may feel a sticky sensation – this is the Chlorhexidine solution binding to your skin as a barrier protection.
